TRAVELLING SINCE MORE THAN TWENTY YEARS

OJ garments and accessories accompany and protect the riders in various situations, ensuring that their little or great journey are comfortable and safe

Whichever is the destination that the rider wants to reach, he knows that he can count on OJ as an experienced and reliable travel companion. He can find, inside our catalogue, the correct jacket to handle any kind of climate, the specific gloves for all your needs and the perfect shoes for every ground. We know very well all your needs and everything you need to face the adventure on your motorcycle. In a safe and comfortable way

Even urban travelers can rely on OJ to cross the city and be warm and dry in winter, cool and light in summer. The vast collection of leg covers for scooters, backpacks and the new line of helmets are designed specifically for urban use.

Continuous research and innovation to give the rider the safety he needs

Innovation and research are activities that we carry out constantly and continuously. The goal is to create products that meet the needs of those traveling on two wheels, solving their problems and giving them greater safety when driving.

All OJ products are born from a research phase, from a meticulous design followed by a phase of rigorous laboratory and road tests. Every seam, every zip, every single component exists because it has a function, not for a simple embellishment.
